

WISCO
Performance Products
PowerSports 2007

After 65 years in the business, the name Wiseco has become synonymous with pistons, especially pistons for off-road racing and riding. Wiseco has attained that instant brand-recognition by being the only U.S. manufacturer of forged pistons for the powersport market, and carry a full line of applications for just about any 2- or 4-stroke engine you can think of. Wiseco is pistons.

But guess what? Pistons are just a part of what Wiseco has to offer. With the constantly evolving powersport market, Wiseco has remained right at the forefront of technology, developing a whole catalog full of innovative products for the off-roader. And coming from Wiseco, you have to know it's all pure quality – just like our pistons. What sort of stuff are we talking about? Good things, everything from forged clutch baskets to stroker cranks – and of course some very special pistons! Check it out. Wiseco, the piston company isn't just pistons anymore...

Forged Clutch Basket

Long-Rod Stroker Crank with 795 Series Pistons and Gasket Kit

CRF450R High-Compression Piston

Forged Clutch Baskets

OEM clutch baskets, inner hubs, and pressure plates are made from inexpensive castings with limited service lives. Even billet machined clutch components are not the optimum for strength-to-weight ratios. By precision forging, Wiseco has taken clutch components to the highest level of durability, wear resistance, and performance. Wiseco FORGED clutch components assure you never compromise putting power to the ground!

CRF450R High-Compression Pistons

While the new generation OE "slipper skirt" pistons are providing tremendous 4-stroke performance, they do wear out – quickly. OEM's recommend 15 hour on ring changes and 30 hours on pistons. Wiseco's High-Compression pistons freshen up those motors nicely, giving that extra bit of grunt 450 owners are looking for. Coming with skirt coating for great break-in, low friction, and durability, Wiseco's High-Compression pistons are available from 11.5:1 (stock 2002-03), 12:1 (stock 2004-06), 12.5:1, 13:1, and 13.5:1 compression ratios. Wiseco has a piston to fill your needs.

Long-Rod Stroker Crank with 795 Series Pistons and Gasket Kit

The Yamaha Banshee is a mainstay of the ATV world, and Wiseco has put together a stroker kit to make the Banshee scream. Included here are a Wiseco 5mm longer rod and a 4mm stroker crank. That's matched with Wiseco's 795 Series pistons, a special gasket kit, and no casework is needed to install at all. Just a bit of cylinder boring ups the displacement considerably – you can give a Banshee 375cc-400ccs, and all for under \$900 retail. Talk about performance at a value!

GP Series 125cc Race Piston

Wiseco has a new line of Racer's Choice 125cc pistons; a "GP" line good for 1.5 more horsepower over stock. The pistons are all ring pinned on the centerline of the intake to reduce chances of the ring catching in the ports (especially in modified motors) and for better mid-and

GP Series 125cc Race Piston

Single-Ring 250cc Race Piston

top-end power, there's no boost porthole in the back of the piston. The ring groove and piston pin area are treated with Wiseco's new "E-Coat" system too. An excellent protection barrier to prevent any type of galling. The pistons are built especially for the intermediate to pro racer, and they're available for all current CR, KX, RM, and YZ models.

Single-Ring 250cc Race Piston

Every 250cc pro-race team runs a single-ring piston and the reason is simple – the bikes make more horsepower and have instant throttle response. Wiseco takes it even further. To prevent any type of galling, the ring groove and piston pin area are treated with Wiseco's new "E-Coating" for extra protection in those crucial areas. The "E-Coated" Single Ring 250cc pistons are a serious performance tweak, perfect for intermediate-to pro-level racers. They're available for all current CR, KX, RM, and YZ models.

13.5:1 KX450F/RMZ450 High-Compression Piston

Complete Gasket Kits

2005-07 Suzuki RMZ450 & 2007 Kawasaki KX450F Pistons

These high performance, two ring 450cc pistons include dedicated forging designs for the ultimate in light weight and strength, skirt coating for improved wear and friction reduction, and optimized dome and valve pockets for ultimate combustion flow. We offer standard bore and oversize pistons made for 12:1 compression ratio... and 13:1 compression for the serious racer.

Complete Gasket Kits

Top of the line gaskets are available for most applications.

Complete Piston Kits

Choose an individual piston, or go with a complete kit. See next page for details regarding our NEW Top End Kits.

Titanium Nitride Rings

Titanium Nitride (TiN) coated rings are designed for extreme racing conditions by providing extended life and sustained power.

Utilized by Yamaha of Troy's 2005 factory race team.

Top End Kits for ATV & Off-Road Motorcycle

Built on our legacy of championships for over 65 years, Wiseco is proud to introduce the next level in performance. Wiseco is now combining the most technologically advanced pistons on the market with a high performance top end gasket kit (and needle bearing where applicable). Everything needed to perform your rebuild the right way the first time. Now you can get the right parts at the right time, fast and easy.

Kits include everything needed for a complete top end rebuild.

Features:

- Wiseco top end gasket kit
- Dedicated forging
- Race proven designs
- CNC machined
- Premium top end needle bearing
- Hi-performance ring set
- Highest quality, alloy pin

Benefits:

- Premium materials produce the best sealing technology available. Exceeding OEM standards
- Superior strength/weight ratio utilizing Aerospace alloy
- Chosen by top race teams, in all forms of racing
- Optimal cam shape & profile for peak HP and service life
- Precision machined, highest quality materials for strength and reduced friction
- Extended life and sustained power
- Consistently true and durable

Wiseco hi-performance forged 2-stroke Pro Lite piston:

- Dedicated forging
- Race proven designs
- CNC machined
- Premium top end needle bearing
- Hi-performance ring set
- Highest quality, alloy pin

- Superior strength/weight ratio utilizing Aerospace alloy
- Chosen by top race teams, in all forms of racing
- Optimal cam shape & profile for peak HP and service life
- Precision machined, highest quality materials for strength and reduced friction
- Extended life and sustained power
- Consistently true and durable

Wiseco hi-performance forged 4-stroke Pro Lite piston:

- Dedicated forging
- Dome design
- Chrome plated piston pin
- Horizontal slot pin oiling
- Pressure seal groove
- Skirt coated
- Dedicated rings

- Light weight and superior strength
- Improved flame travel
- Reduced friction / scuff resistant
- Reduced friction / scuff resistant
- Maximum ring seal
- Reduced friction (*racing applications only*)
- Maximum compression and oil control

Precision Forged Clutch Baskets, Inner Hubs & Pressure Plates

Wiseco forged clutch components have greater strength due to “feature aligned grain flow.” Compared to castings or products machined from billet, Wiseco Precision Forgings can be lighter and still have increased mechanical properties resulting in higher strength, ductility, and resistance to impact and fatigue.

- Forged from lightweight, high strength, certified, aerospace grade aluminum alloy.
- Hard anodized for an ultra tough abrasive resistant surface ensures a long life of smooth clutch operation through the elimination of wear on the sides of the clutch basket tabs.
- A Teflon coating seals the clutch basket to create a near frictionless surface for the clutch disks to glide upon.
- Wiseco’s CNC machining process produces each clutch basket dimensionally the same as the next.
- Weight reducing relief cuts on the outside diameter of the clutch basket reduce rotational mass, which lowers the centrifugal force acting on the clutch basket and increases overall acceleration of the engine.

- Large oiling holes in the clutch basket tangs increase lubrication, reduce heat build up, and reduce weight.
- Supplied with high quality fasteners complete with pre-applied thread locker for a secure grip during assembly.

Friction Plates

Wiseco Friction Plates are manufactured to exact OEM specifications. They feature long life and performance without sacrificing durability. Wiseco Friction Plates are designed for use with stock clutch components or those offered by Wiseco.

Steel Drive Plates

Wiseco Steel Drive Plates offer longevity, durability, and the feel of OEM.

Alloy Drive Plates

Wiseco Alloy Drive Plates feature improved engine performance resulting from less rotational mass and quicker lock-up than conventional steel drive plates.

Clutch Covers

Wiseco clutch covers are CNC machined from aerospace grade aluminum alloy, and are hard anodized for maximum protection and wear resistance. They offer improved puncture resistance over stock cast covers in extreme riding conditions.

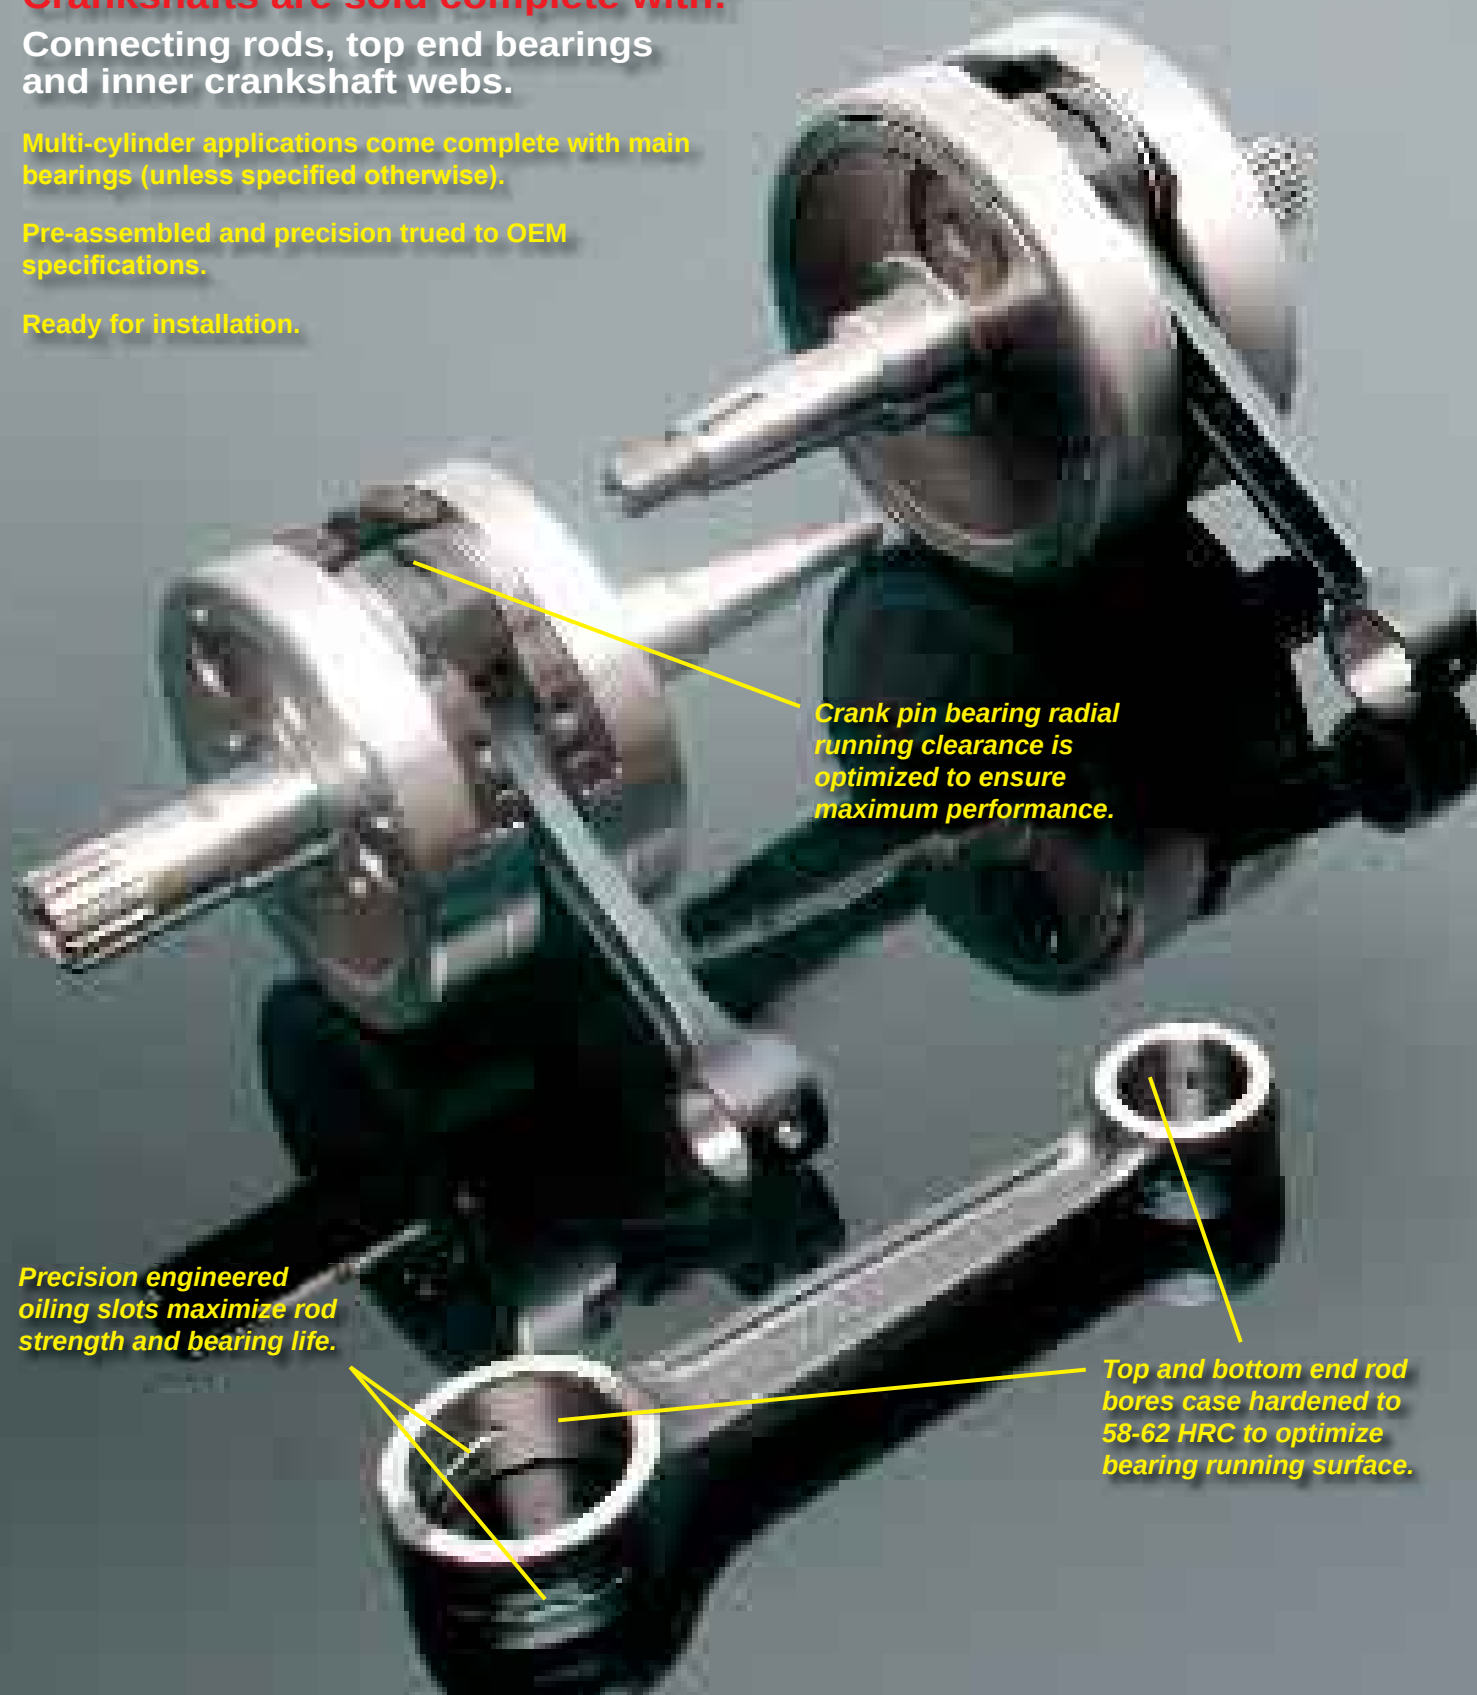

Crankshafts are sold complete with:

Connecting rods, top end bearings and inner crankshaft webs.

Multi-cylinder applications come complete with main bearings (unless specified otherwise).

Pre-assembled and precision trued to OEM specifications.

Ready for installation.

Connecting Rod Kits are sold complete with:

Rod, crank pin, crank pin bearing, top end bearing and thrust washers.

Double forged, Wiseco connecting rods maintain superior dimensional consistency through improved grain flow. Shot peening eliminates residual stresses and smoothly blends the rod forging surfaces. Extensive tests verify that shot peened rods provide more consistent dimensioning and surface finish than hand ground and polished rods. This produces superior strength under heavy loads.

WISECO PISTON COMPANY, INC., LIMITED PISTON WARRANTY

WISECO warrants this product will be free from defects in material and workmanship for thirty (30) days following date of original purchase. If the product is found by WISECO to be defective, such products will, at WISECO'S option, be replaced or repaired at cost to WISECO. All products alleged by Purchaser to be defective must be returned to WISECO, postage prepaid, within thirty (30) days warranty period.

This limited warranty does not cover labor or other costs or expenses incidental to the repair and/or replacement of products or parts. This limited warranty does not apply to any product which has been used in a hi-performance application, or racing, or is subject to misuse, mishandling, misapplication, neglect (including but not limited to improper maintenance), accident, improper installation, modification (including but not limited to use of unauthorized parts or attachments), or adjustment or repair performed by anyone other than WISECO.

The parties hereto expressly agree that the purchaser's sole and exclusive remedy against WISECO shall be for the repair or replacement of the defective product as provided in this limited warranty. This exclusive remedy shall not be deemed to have failed of its essential purpose so long as WISECO is willing and able to repair or replace defective goods.

THIS LIMITED WARRANTY IS IN LIEU OF ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING THOSE OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE NOT EXPRESSLY SET FORTH HEREIN. ANY PRODUCT WHICH MAY BE SOLD BY WISECO BUT WHICH IS NOT MANUFACTURED BY WISECO IS NOT WARRANTED BY WISECO, BUT IS SOLD ONLY WITH THE WARRANTIES, IF ANY, OF THE MANUFACTURERS THEREOF.

WISECO'S liability (whether under the theories of breach of contract or warranty, negligence or strict liability) for its products shall be limited to repairing or replacing parts found by WISECO to be defective, or at WISECO'S option, to refund the purchase price of such product. In no event shall WISECO be liable for incidental or consequential damages arising out of or in connection with the product. Consequential damages shall include, without limitation, loss of use, income or profit, or losses sustained as the result of injury (including death) to any person, or loss of or damage to property.

Any claim by purchaser regarding this product shall be deemed waived by the purchaser unless submitted in writing to WISECO within the earlier of (i) fifteen (15) days following the date Purchaser discovered, or by reasonable inspection should have discovered, any claimed breach of this limited warranty, or (ii) thirty (30) days following the date of original purchase. Any cause of action for breach of this limited warranty shall be brought within six months from the date the alleged breach was discovered or should have been discovered, whichever occurs first.

This limited warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

*CYLINDER TYPE CODE DESCRIPTIONS

- AC:** Original cylinder bore is alloy-chrome plated, nikasil, electrofused or boron composite. Cylinder must be bored to accept new sleeve.
- CS:** Original barrel has cast-in liner in cylinder. Cylinder must be bored out to accept new sleeve. Cast-in liner will be bored completely out of cylinder. Do not try to push out the cast-in liner, cylinder damage may result.
- CI:** Original barrel has cast-iron liner. Cylinder must be bored to accept new sleeve. Cast-in liner will not be completely removed. Sleeve is designed to insert into the iron lined cylinder.
- RS:** Original barrel has a replacement sleeve. Heat cylinder to remove sleeve. Re-heat cylinder to install new cylinder sleeve.

All Wiseco rings can be used in cast iron, nickel ceramic platings (Nikasil), boron composite, and Electrofusion bores.
CAUTION: Unless otherwise noted, Wiseco rings can NOT be used in chrome plated bores. Engine damage will occur.
*CSM & CDM rings are designed to be used in chrome bores.

New from Wiseco

Titanium Nitride coated rings are designed for extreme racing conditions by providing extended life and sustained power. Utilized by Yamaha of Troy's 2005 factory race team. Packaged individually.

Key features

- Reduced friction
- Wear resistance
- Harder than chrome

Key benefits

- Resists wear from exhaust bridge that plagues today's high performance two cycle engines.
- Maintains size and geometry for exceptional ring seal providing sustained peak performance.

4-Stroke Rings

All Wiseco rings can be used in cast iron, nickel ceramic platings (Nikasil), boron composite, and Electrofusion bores.
CAUTION: With the exception of the XJ rings, Wiseco 4-stroke rings can NOT be used in chrome plated bores.
*XJ rings are designed to be used in chrome bores.

Tapered Ring Compressor Sleeves

- Machined from Wiseco sleeve forgings to offer the same toughness as Wiseco's forged pistons.
- Hard anodized and Teflon coated for low friction and prolonged wear resistance.
- Sleeves have a smooth radius that tapers down to the specific bore size.
- Compresses the piston rings smoothly and evenly.
- Greatly reduces the difficulty with installing thin high-performance oil rings.

Cast Iron Sleeved Cylinders: To ensure proper ring seal, it is necessary to hone the cylinder with a rigid or brush hone. DO NOT install a new piston without honing the cylinder to break the glaze. Finish hone with a 280 grit. Cross hatch is necessary to ensure proper ring seal and adequate lubrication. If the cylinder is in good condition, simply honing the cylinder may be enough to restore the bore to an acceptable condition. However in some cases, boring may be necessary to insure the cylinder bore is within the tolerances outlined in the service manual.

Plated Cylinders: (Includes nickel ceramic coatings (Nikasil), chrome, Electrofusion, and boron composite.) If the plated cylinder is in good condition, honing may not be necessary. If deglazing is necessary, DO NOT use a ball hone. Use a rigid or brush type diamond hone. Plated cylinders cannot be bored oversize without replating or resleeving.

Any time a cylinder is bored or honed: All ports must be chamfered. The top of the cylinder should be deburred, and the bottom should be generously chamfered for ease of piston and ring installation. When boring a cylinder with an exhaust bridge, the face of the bridge must be relieved .002"-.004" to allow for bridge expansion. Without proper bridge clearance, engine damage could occur.

IMPORTANT: After honing, the cylinder must be washed with warm soapy water to remove all honing grit. Be sure to wash away any grit that may have traveled into the transfer and exhaust ports during honing. The cylinder is NOT clean until you can wipe the cylinder wall with a clean, oil dampened cloth and it does not pick up any honing grit. Lightly oil the cylinder bore to prevent oxidation and assist with piston installation.

Exhaust Power Valves (2-Stroke engines): When boring cylinders with exhaust power valves the exhaust power valve must be inspected to ensure it does not extend into the cylinder. The exhaust power valve must have approximately .015" clearance from the cylinder bore. Without proper clearance, the exhaust power valve could contact the piston and engine damage could occur. If machining the exhaust power valve is necessary, remove metal only in the area that extends into the cylinder bore. (See illustration)

The Choice Connection

Wiseco supplies Carrillo Rods!

Carrillo H-Beam Chrome Moly Steel Rods are designed with the serious racer in mind. Each rod is balanced and shot peened to achieve the ultimate in strength and fatigue properties to endure the most challenging conditions during high-performance competition.

Kits include four rods and SPS rod bolts.

Since 1963, Carrillo has been
the Choice Connection of Perfomance Rods.

Not legal for sale or use on pollution controlled vehicles
